PROFESSIONAL SUMMARY

Highly skilled and results-driven Software Engineer with comprehensive experience spanning web, backend API, and mobile application development across UK and Nigerian ecosystems. Expert in full-stack architecture specializing in Laravel, React, Next.js, and TypeScript. Proven track record of designing high-throughput RESTful APIs, implementing automated CI/CD deployment pipelines, and building performant cross-platform mobile applications. Skilled technical leader adept at optimizing enterprise system infrastructure and driving product delivery from concept to production.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, PHP, SQL (MySQL, PostgreSQL), HTML5/CSS3
- **Frameworks (Web):** React, Laravel, Next.js, Inertia.js, Tailwind CSS, Fortify
- **Mobile:** React Native, Expo Router, Flutter
- **DevOps & Tools:** GitHub Actions, Docker, Bun, Git, Linux/VPS, EAS, CI/CD
- **Databases/Tools:** MySQL, PostgreSQL, Redis, Postman, Bruno, RESTful APIs
- **Core Competencies:** System Architecture, Payment Gateways (Paystack, PayPal), Geospatial Tracking, Authentication & Security (JWT)

PROFESSIONAL EXPERIENCE

Web Developer | ABCCloud

United Kingdom (Remote) | January 2026 – Present

- Spearheaded the migration of monolithic web platforms into high-performance, SEO-optimized web applications using Next.js, React, and TypeScript.
- Built responsive, dynamic user interfaces utilizing Tailwind CSS, Shadcn UI, and Framer Motion, drastically improving user retention and scannability metrics.
- Collaborated with cross-functional UK teams to deploy scalable, automated frontend workflows using GitHub Actions and Bun, reducing build times by 35%.
- Implemented secure token-based state management and seamless client-side navigation logic, ensuring robust, zero-lag user experiences.

FullStack & Backend API Developer | Remlex Technologies

Lagos, Nigeria | February 2022 – January 2026

- Engineered, optimized, and maintained high-traffic RESTful API backends utilizing PHP and Laravel, processing thousands of secure server requests.
- Architected end-to-end e-commerce order lifecycles ("Order-Charge-Stock"), integrating secure payment gateway modules including Paystack and PayPal.
- Constructed clean authentication architectures leveraging Laravel Fortify to enforce strict multi-role permission handling and data encryption.
- Optimized relational database queries and MySQL schemas, reducing API endpoint latency by 30% and implementing secure Redis caching layers.

Mobile Developer | YemtechIT

United Kingdom (Remote) | January 2021 – December 2021

- Designed and engineered cross-platform mobile applications using React Native and Expo Router, ensuring full native compatibility and strict version control.
- Built secure navigation guards and location-aware modules featuring real-time geospatial tracking and nearby search functionality.
- Streamlined mobile deployment pipelines using Expo Application Services (EAS), cutting down App Store and Google Play testing deployment cycles by 50%.
- Integrated client-side applications with secure RESTful APIs, optimizing data fetching routines to minimize cellular data overhead.

EDUCATION

Higher National Diploma (HND) in Computer Science | Graduated with Distinction

Lagos State Polytechnic, Nigeria | [Year of Graduation]

CERTIFICATIONS

- Advanced React & TypeScript Architecture — Udemy Certification
- Enterprise Backend Development with Laravel — Udemy Certification
- Next.js Production-Ready Full-Stack Applications — Udemy Certification
- Mobile Application Engineering with React Native & Expo — Udemy Certification
- Ultimate React & Next.js Masterclass – Udemy Verification (2025)
- Advanced Laravel & Enterprise API Development – Udemy Verification (2024)
- Full-Stack Software Architecture Frameworks – Udemy Verification (2023)
